I just sent this so incident command is aware of what is happening in the region.

Fyi. Just so you know this group is being formed and Shaun has given direction for this group to make decisions like who participates in the technical working group or the spill coordination group.

Stay tuned.

Hi all. Just to be clear, at Shaun's request I have sent an invitation for a meeting this afternoon to stand up a new GKM leadership team. The participants in that meeting will discuss this, among other things. We will make sure the direction on this coming out of that meeting is communicated to this group. We will also communicate more broadly the purpose and scope of the new group after the meeting this afternoon. Thanks. Joan

I want the R8 GKM coordination team to discuss this at the their meeting this afternoon and determine who will represent the Region at the next meeting hosted by Sen Roberts and participate going forward.

Should we talk about this today? Seems like this is might be something that is outside of the response, or not, and therefore something that we might want to monitor outside of the UAC?

This seems like something we should be involved in. I will be in Durango on the 22nd.

Attached are two sets of minutes from the 8/31/15 meeting - my thanks to Matt Thorpe for his set and to facilitator Marsha Porter-Norton for hers. Also, my thanks to the folks from RWEACT who drove over from the San Luis Valley to share their experience of creating a coalition of existing organizations to support community recovery efforts after the West Fork Complex fires. A follow up meeting for those interested is scheduled for September 22nd, from 10:30-1pm at the same meeting room in the Durango Public Library to determine next action steps. The agenda for that meeting is also attached and Marsha will again facilitate the meeting as we transition to a coordinator led or steering committee model. Please let me know if you have any questions and I hope you can join us on Sept. 22nd at the Durango library.- Ellen
